

Exciting Upgrades at GESLabs

The conclusion of our dedicated 18-month optimisation programme has resulted in significant reduction to our manufacturing costs...which means better value for our partners!

Enhancements for Unmatched Quality and Efficiency

Over the past 18 months, our dedicated team of engineers has focused on optimizing and modernizing our South African manufacturing facility. These advancements, now fully implemented and validated, have step-changed our production efficiencies highlighted by the following:

- **We've Doubled our Cold-Ethanol Extraction Capacity:** A 100% increase in our production of full-spectrum decarboxylated crude oil with not less than 70 wt% THC/CBD
- **We've Quadrupled our Distillation Capacity:** Boosting our high-vacuum, wiped film distillation line by 400% delivering not less than 90 wt% THC/CBD
- **We've Engineered a Tenfold increase in Downstream Formulating:** Expanding our capacity by 1000% for formulated oral formulations and inhalation cartridges

We are committed to enhancing the quality and affordability of healthcare for medical cannabis patients worldwide.

Unprecedented Value for Our Partners

These critical upgrades bring immediate and substantial value to the market:

- **Investment in Supply Chain:** Vertically integrated supply chains ensure stable, reliable supply of high-quality, value raw materials for processing
- **Investment in Equipment:** Enhancing our technological capabilities and setting the benchmark for world-class cannabis manufacturing
- **Process Optimization:** Streamlining our processes to ensure superior product quality, consistency and rapid turnaround on orders

Join us on this exciting journey and experience the unparalleled quality and value our advancements offer. **These enhancements in our business have lead to a 25% reduction on our manufacturing costs and so expect significant changes to our ethanol-based products.**
